Abstract artwork by [Artist Name]
[Additional text, likely a title or description of the piece]

[Small text label, possibly a name or title]

Figure 1: The Earth's magnetic field is generated by the motion of molten iron in the outer core. The field is represented by the red and blue lines. The Earth's rotation is shown by the curved arrows. The field lines are shown to be distorted by the Earth's rotation and the motion of the molten iron.
